SUMMARY

Entry-level Data Analyst with hands-on project experience in data cleaning, analysis, visualization, and dashboard development using Python, SQL, Excel, and Power BI. Skilled in data transformation, KPI tracking, trend analysis, data visualization, and generating business insights from real-world datasets. Recently completed Data Analytics certification with practical projects focused on solving business problems through data-driven analysis.

INTERNSHIP

Data Scientist Intern | Data Analytics

Dec 2022 – Jan 2023

Fantasy Solution, Trichy

- Gained practical exposure to data analytics by cleaning and analyzing structured datasets using Python and SQL.
- Performed basic exploratory data analysis (EDA) to identify trends and patterns in datasets.
- Generated data-driven insights and reports to support analysis and understand business requirements.

PROJECTS

Indian Two - Wheeler Resale Market Analysis | [GitHub](#)

- Cleaned and transformed two-wheeler resale data using Python (Pandas), handling missing values, duplicates, data types, categorical values, and outliers using the IQR method.
- Built an interactive Power BI dashboard with KPI cards and multiple visualizations to compare original price, resale price, resale value %, depreciation, fuel type, owner type, brand, seller type, and insurance status.

INR vs World Currency Exchange Rate | [GitHub](#)

- Cleaned and transformed 833 rows of forex data (USD, GBP, EUR vs INR, 2023–2026) into a validated 725-row dataset in Excel using Flash Fill, VLOOKUP, and conditional formatting to handle missing values.
- Built a Star Schema data model in Power BI with DAX measures to calculate daily currency changes, total trading days, and high-volatility day counts, and designed an interactive 3-page dashboard with 14+ visuals.

E - Learning Platform Purchase Analysis | [GitHub](#)

- Created a relational database with Learners, Courses, and Purchases tables using Primary Key and Foreign Key relationships, and used INNER, LEFT, and RIGHT JOINS for data analysis.
- Analyzed learner spending, course purchases, and category-wise revenue using Subqueries, CTEs, CASE expressions, NULL handling, and Views to generate business insights.

SKILLS

Programming & Tools: Python, NumPy, Pandas, SQL, MS Excel, Power BI

Data Analysis & AI: Data Analysis, ETL, Business Intelligence, Data Cleaning, Data Transformation, Understanding Data Structures, Trend Analysis, KPI Tracking, Data Visualization, Data Modeling, Dashboarding

Soft Skills: Problem Solving, Analytical Thinking, Communication, Team Collaboration

CERTIFICATIONS

Certification in Data Analysis – Entri Elevate

Mar 2026 – Sep 2026

In Collaboration with Illinois Tech, US

- Earned certification in Data Analytics covering Python, SQL, Excel, and Power BI.
- Completed hands-on projects using real-world datasets for data cleaning, analysis, and visualization

EDUCATION

Bachelor of Science in Computer Science (B.Sc.)

Bharathidasan University

Trichy, Tamil Nadu

2024 – Present
